Spend time with your family, go fishing with friends or just enjoy the drive of the waves - all this becomes possible with AQUASPIRIT boats

HONORING THE CRAFT

The Full production circle of high-quality RIB type boats with an aluminum hull for both leisure and professional use.

SPIRIT

SPIRIT models perform a new round in the development of classic RIB boats, representing a combination of our experienced staff, sophisticated technology and high-quality materials. Stylish and ergonomic design, diverse product range, optimal weight and perfect performance features will undoubtedly fulfill all your special requirements. A feeling of drive and euphoric mood while driving SPIRIT boats are difficult to express in words, it is worth going through such a buzz on your own.

EVERYTHING YOU DREAMED OF

Spirit 700 is the flagmanship model of AQUASPIRIT, which combines a modern fast-paced design, incredible interior space with excellent seaworthiness. The concept of creating this RIB boat is the combination of a fully aluminium boat with a D-shaped tube that increases performance and safety. Thanks to the use of a D-shaped tube, a significantly larger internal space has been achieved in comparison with traditional RIB type boats. Not one traditional 7m long RIB offers as much space as the SPIRITS 700 - a new level with an internal width of more than two meters.

SPIRIT
700

S700 - impresses by creating stylish, modern and user-friendly designs using sophisticated and ingenious solutions from marine aluminum.

S700 - with the wide variety of additional options, you can create the boat of your dreams.

SPIRIT 700

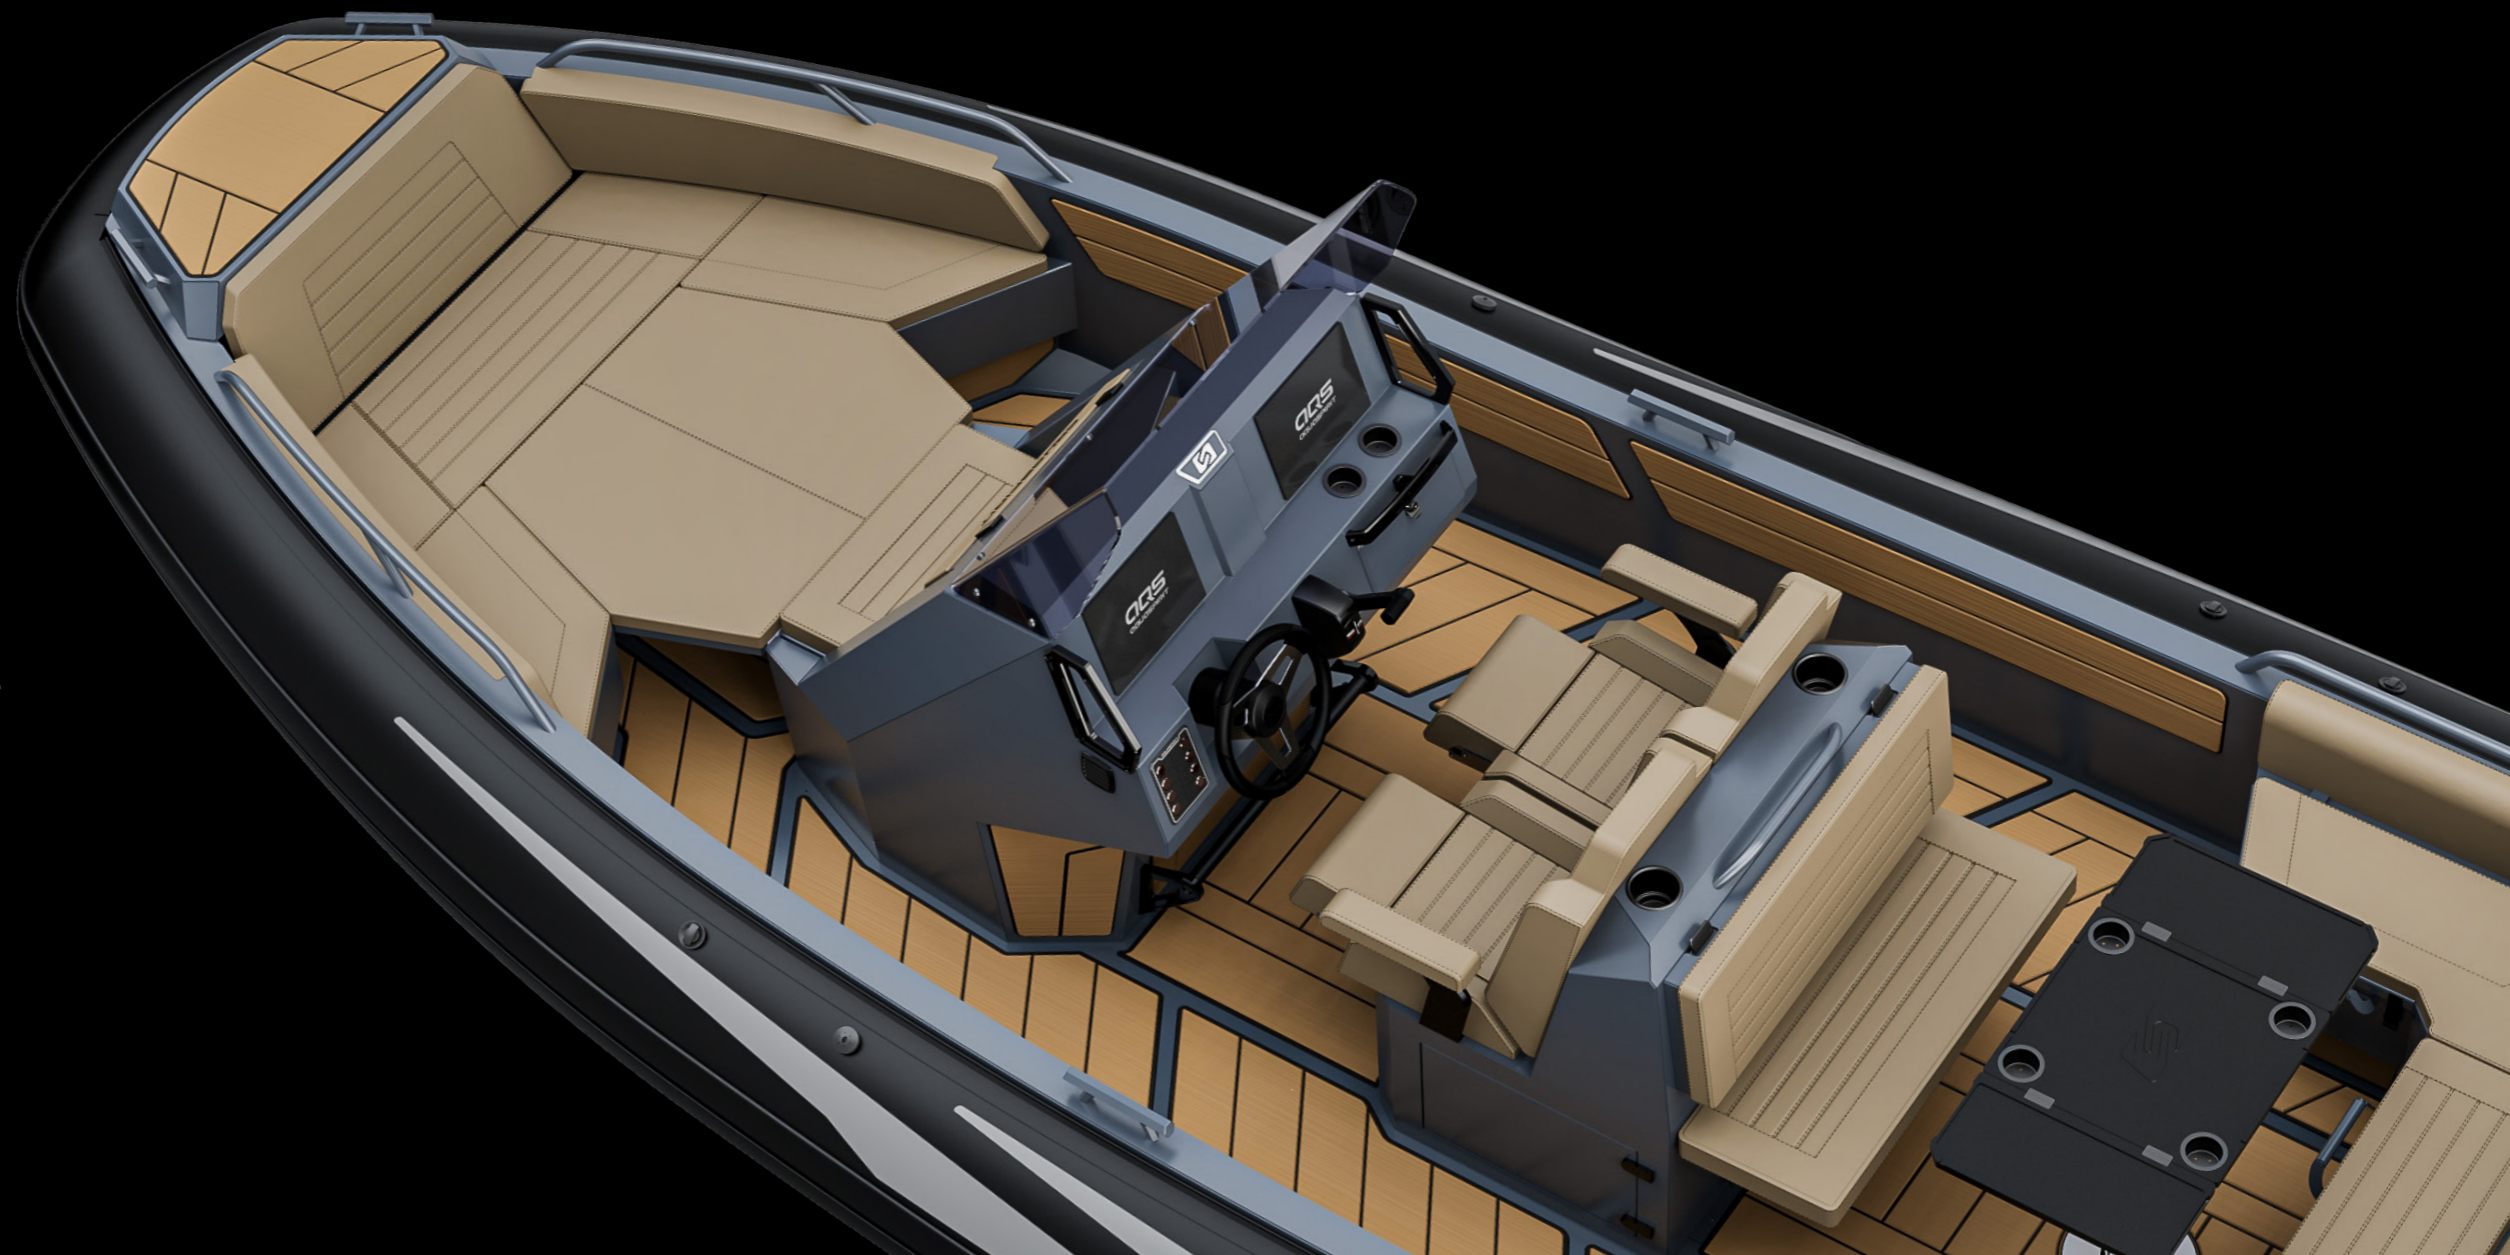

Precisely calculated hydrodynamics of the hull and the excellent seaworthiness are the advantages that are characteristic of all SPIRIT models. The deep V-shaped hull of the SPIRITS 700 allows you to enjoy riding both on smooth water and on sea waves. Stop searching, you found it!
SPIRIT 700 - Quality and comfort in a new fresh look, all at once.

MODEL	CAPACITY	LOAD	POWER	BEAM	LENGTH
SPIRIT 700	11 ppl	1340 kg	250 h.p.	2,85 m	6,995 m
